

FireFly

Force and intelligence for setting of blind rivet nuts

Smart handling

- No more two-handed, white knuckled operation: Power, brains and giant stroke allow fully single-handed operation.
- A special lever design as well as the ratchet mechanism provide a reduction of 40 % of the hand force needed to set a blind rivet nut.
- Exchange of nosepiece and threaded mandrel and stroke adjustment without any tool
- The stroke is 9 millimeter long for setting of new generation multigrip blind rivet nuts like new the GESIPA® PolyGrip® blind rivet nuts

Technical characteristics

Total stroke: 9 mm (0,35")
 Single action stroke: 1,8 mm (0,07")
 Weight: 750 g (1,65 lbs)

Operating range

Ø M3 to M6 aluminium and Ø M3 to M5 steel

Scope of delivery

Equipped with M5 nosepiece and threaded mandrel, in plastic carrying case with 2 Alu M4 and M5 blind rivet nuts minipacks, as well as M4 nosepiece and threaded mandrel, operating instructions and stroke adjustment list

**Part No.
752 0001**

FireFly in cardboard box

Equipped with a nosepiece and threaded mandrel and operating instructions

Description	Part No.
FireFly M3 in cardboard box	752 0003
FireFly M4 in cardboard box	752 0004
FireFly M5 in cardboard box	752 0002
FireFly M6 in cardboard box	752 0006

Threaded mandrels and nosepieces

Description	Part No.
M3 threaded mandrel	702 1015
M4 threaded mandrel	702 1014
M5 threaded mandrel	702 1013
M6 threaded mandrel	702 1026

Description	Part No.
M3 nosepiece	702 1008
M4 nosepiece	702 1007
M5 nosepiece	702 1006
M6 nosepiece	702 1010
