PolyGrip® blind rivet nuts –
The GESIPA® blind rivet nuts
with large grip range

The PolyGrip® blind rivet nuts

Die PolyGrip® blind rivet nuts are the logical further development of many years of experience with our PolyGrip® multi-range blind rivets. Thanks to the benefits of its large drilling hole tolerance and the option of covering various grip ranges with just one fastener, the PolyGrip® blind rivet nut has become a first-choice connector in many industrial applications and in trade.

Bringing together multiple dimensions saves handling and storage costs while also permanently reducing the risk of confusion in the workplace and the quality problems this can result in.

Large grip range: Ideally, the one PolyGrip® blind rivet nut can replace up to five different dimensions of DIN standard blind rivet nuts thanks to the large grip range.
